Tenure-Track Faculty Position in Urban Design
City and Regional Planning/Architecture
College of Architecture
Georgia Institute of Technology

The College of Architecture at Georgia Tech aspires to elevate the standing of scholarship in urban design. To do so, our City and Regional Planning and Architecture Programs seek a jointly-hired tenure-track assistant or associate professor who would bridge the two fields of architecture and planning specifically in the area of urban design.

The College of Architecture has accomplished faculty who contribute to our urban design activities within the City and Regional Planning, Architecture, and Ph.D. Programs. Further, three of the College's research centers – the Center for Quality Growth and Regional Development, the Center for Geographic Information Systems, and the Imagine Lab – support innovative funded research and scholarship that advance urban design. The College is home to the *Journal of the American Planning Association* and is a partner with the journal, *Places*. Students in the College can pursue graduate degrees in urban design concentrations through the Master of Architecture, Master of City and Regional Planning, the dual M.Arch/MCRP, or a post-professional Master of Science in Urban Design.

Specifically, we seek candidates with a commitment to integrating planning and design expertise in their classroom and research activities. The successful candidate would be expected to teach graduate coursework in urban design policy and implementation, to supervise students in planning and design studios, and to advise students and participate in urban design studio reviews in the various urban design degree programs. Candidates holding a Ph.D. in City and Regional Planning with a professional degree in architecture, landscape architecture, or civil engineering are highly preferred. Demonstrated potential or proven record of scholarship and creative activity in urban design is required. We particularly encourage candidates who can increase the diversity of our faculty. The position will begin in August 2008, or as otherwise negotiated. We offer a competitive salary and benefits package.

Applicants should submit hard copies of their curriculum vitae; at least three samples of publications, reports, or designs; three letters of reference; and a statement of teaching, professional, research, and service interests to:

Dr. Brian Stone
Chair, Urban Design Search Committee
City and Regional Planning Program
College of Architecture
Georgia Institute of Technology
Atlanta, GA 30332-0155

In addition, please submit application materials, in PDF format, to: brian.stone@coa.gatech.edu

Formal review of applications will begin December 7, 2007.
The position(s) will remain open until filled.
